numb

Shooting

Sore

Exhausting

Stiff

PAIN

Stabbing

Radiating

Penetrating

Burning

Throbbing

Creaky

Miserable

Nagging

Tiring

Gnawing

Pain – Facts

- **Pain may come with aging but people do not have to live with it**
- **Pain is significantly under-reported in nursing facilities**
- **In nursing homes, many experience pain**
- **Nurse aides commonly underestimate pain**
- **Under rating and under-treating pain can be neglect, negligence, or abuse**
- **Nursing homes that do not manage pain properly will be cited**

Reactions to Pain

- Religious beliefs and cultural traditions affect pain
- Men and women may report pain differently

Acute Pain

- Temporary
- Usually comes on suddenly
- Goes away when healing is complete

Acute Pain

- Serves a purpose
- Obvious when people are in acute pain
- Acute pain can rev up the body

Chronic Pain

- Considered long-term
- Gradual onset
- No purpose
- Diagnosing cause can be complicated
- Source of chronic pain may not be obvious
- May seem depressed

Common Causes of Pain

Pain – Effects

- Giving up hope
- Depression
- Anxiety
- Withdrawal
- Change in appetite
- ↓ in activities
- Inability to sleep

Pain – Effects

- Restlessness/agitation
- Refusal to participate
- Suicide
- Negative effect on immune system
- ↑ risk for injuries, falls or accidents

Pain – Use of Medications

Nurse aide reports complaints of pain to nurse so nurse can assess and medicate if appropriate

Pain – Nurse Aide's Role in Management

*Nurse aides play an important role
in pain management*
