

**Some NCCCS WCE Course and Credential Combinations Potentially Eligible for Workforce Pell  
(Courses with credentials that have been run for 150-599 hours, within 8 to <15 weeks)**

**This working list highlights short-term, nondegree workforce courses and related credentials that have been run by at least some NC community colleges within the time parameters required by Workforce Pell law -- 150-599 hours and 8 to <15 weeks. To be deemed eligible, programs will also need to show completion rates of at least 70%, job placement rates of at least 70%, and earnings that reflect a positive ROI, defined as median earnings that exceed program tuition/fees + 150% of the federal poverty level. Available statewide data are shown for reference, but it is not yet known which data sources will be used for program eligibility (institutional, state, or federal), or if there will be flexibility.**

*^Wage Match Rate is a proxy for Job Placement Rate. It may underestimate job placement, especially for occupations with high rates of self-employment, border-state employment, and federal employment. Wage match rates and median earnings could also be lower for courses that are frequently offered in prisons.*

*\*Cells with an asterisk means there wasn't enough data to be reliable/offer a meaningful statistic.*

**Data sources and methodology:**

Source of information/data on courses, credentials, and completion rate: Colleague system (NCCCS).

Source of data used to match completers with SSN to labor market outcomes: Common Follow-up System -- Quarterly Wage Records.

Completion rate: for 2023-24 students in courses that had the listed credential as primary credential, % of students with grade of A, B, C, D or P.

Match rate: of 2022-23 course completers with a valid SSN, percentage with earnings shown in quarterly wage records roughly six months later.

Median earnings: for 2022-23 completers of a course showing earnings in quarterly wage records, annualized median earnings.
